

Persons of the FCC,
The last time I checked you a governmental agency work for the people of the United States and not Special Interest groups.

As an American I have the right to choose where I want to spend my money and what I want to listen to.

I have XM radio and am fully satisfied with the service. I pay for the service while standard radio is free..

Banning weather and traffic services is not in the best interests of the Americans who choose to purchase this service.

As society changes and new technologies are adopted certain business become outdated.

Your alignment with standard broadcast radio is in the best interests of the current radio broadcast system and not in my best interest.

Why don't you let free enterprise decide. I believe that is the best course of action.
